Gravity Roller Conveyor

- 5' 0" & 10' 0" long sections standard, other lengths available
- 1.9", 2-1/2", 3-1/2" diameter rollers available, various roller centers
- Complete line of accessories available to automate system.
- Laser cut, precision formed 8 ga. structural frame components
- Carbon steel, galvanized finish standard, painted finish available
- Support legs with +/- 3" adjustment
- Available in full stainless steel construction
- Loads to 4000 lbs. standard, additional capacities available

All InterSystems conveyors are constructed of the highest grade materials and are built on state-of-the-art equipment. All side frames as well as any surfaces that may see human contact are precision laser cut. This also saves time and cost by eliminating secondary finishing operations. Materials used are of a higher grade than mill run structural members, resulting in higher tensile strength.
